

Batter Marinade Mixer

Batter Mixer

Total Food Machines offers an extensive range of machinery, designed to meet the diverse needs of your production line—from batter mixers to complete frying systems, including battering, breading, crumbing, and frying lines.

Our **Batter Mixer** is an ideal solution for a variety of industries, including butchers, supermarkets, poultry processors, fishmongers, and more.

This versatile mixer is specifically engineered for both batters and marinades, capable of handling adhesion batters, high-viscosity batters, and tempura batters with ease.

Product Features and Benefits:

- **Efficient Operation:** The Batter Mixer is designed for ease of use, maximising efficiency and productivity within your facility. Its user-friendly interface ensures smooth operation, minimizing downtime.
- **Adjustable Mixing Time:** The mixing time can be easily adjusted to suit your specific production needs, offering flexibility to meet the unique demands of your manufacturing process.
- **Intermittent Remix Cycle:** Equipped with an intermittent remix cycle, the Mixer effectively prevents separation of water and batter during mixing. This ensures a consistent batter quality, allowing you to focus on production rather than maintaining the consistency of the mix.
- **Gate Valve for Easy Access:** The machine is fitted with a convenient gate valve, enabling the user to

manually supply batter to the applicator at any time, improving workflow efficiency and control. Our **Batter Mixer** is the perfect solution for businesses looking to streamline their battering processes, ensuring consistent, high-quality results with minimal maintenance.
