

Boot & Shoe Rack Holders

Boot & Shoe Rack Holders

Various sizes of stainless steel racks for boots and shoes available.

Used in the food manufacturing and processing industry to reduce space and for hygiene.

Available in single or double holders.

Can also be supplied with heating and a timed drying system.

External cold air passes through the fan to the dryer frame where it is heated by an electric heater. A germicidal lamp disinfects the air drying the shoes. The heated air is fed along the arms directly to the suspended boots/shoes ensuring high efficiency of warm air, drying and disinfection.
