

N&N Portable Tote Bin Lifter

N&N Portable Tote Bin Lifter provides a safe and efficient solution for lifting and tipping standard 200-litre stainless-steel tote bins within food-production environments.

Its compact, mobile design allows the machine to be moved easily between processing areas, making it a flexible alternative to a permanently installed lifting system.

With a maximum load capacity of 250 kg and a tipping height of approximately 1,290 mm, the lifter is ideal for loading mixers, vacuum tumblers, cooking vessels and other food-processing equipment.

Its specially designed discharge section helps guide products smoothly into the receiving machine, reducing spillages, product waste and manual handling.

Manufactured for hygienic food-production applications, the N&N tote bin lifter combines robust construction with simple controls and essential operator-safety features.

It is suitable for handling meat, poultry, fish, vegetables, ready-meal ingredients, pet food and many other products.

Contact Total Food Machines today to discuss the N&N Portable Tote Bin Lifter or your complete product-handling requirements. N&N Portable Tote Bin Lifter, Suitable for 200L tote bins, small and compact machine, easy to move, 3 Phase, Tipping height 1290mm

Can be used in various industries for multiple products such as meat, poultry, fish, vegetables, pet food and many others.

For further information on the N&N Portable Tote Bin Lifter or any of our other machines, please do not hesitate to contact our sales team at Total Food Machines.
