

500 Litre Gas Scrape Surface Cooking Kettle

500 Litre Gas Scrape Surface Cooking Kettle

Total Food Machines supplies this robust 500-litre gas-heated scrape-surface cooking kettle for high-volume commercial and industrial food production.

Manufactured in the Netherlands by T&S, this versatile stainless-steel cooking vessel is designed for producing soups, sauces, gravies, curries, stews, ready meals, pie fillings, meat products, vegetables, pasta, rice, preserves and many other food products.

The integrated agitator provides continuous and consistent mixing throughout the cooking process. It moves products across the bottom of the inner vessel, helping reduce sticking, scorching and uneven cooking.

With its large 500-litre capacity, this industrial gas cooking kettle provides an efficient solution for food manufacturers looking to increase output while maintaining consistent product quality.

Main Features

- 500-litre cooking capacity
- Gas-heated cooking system
- Integrated product agitator
- Scrape-surface mixing options
- Accurate temperature control
- High-quality stainless-steel construction
- Hygienic and easy-clean design
- Suitable for solid, liquid and particulate products
- Controlled and consistent heat distribution
- Product discharge options
- Heavy-duty industrial construction

The cooking kettle can be configured for natural or mains gas, with LPG options available where required. The final gas specification will be confirmed to match the customer's factory supply.

This vessel is suitable for ready-meal manufacturers, sauce and soup producers, bakeries, meat processors, central

kitchens and other high-volume food-production facilities.

Total Food Machines can assist with equipment selection, production planning, delivery and installation.
