

VFFS and Weighing System

VFFS and Weighing System

VFFS Bag Sealer Machines

We offer a range of Vertical Form Fill and Seal (VFFS) machines, designed to meet diverse packaging needs across various industries, including food, beverages, pharmaceuticals, and cosmetics. These machines are ideal for packaging dry goods, powders, snacks, and more.

Key Features and Capabilities:

- **Customisable Sizes & Throughputs:** Available in various models to accommodate different bag sizes, throughput requirements, and sealing bar configurations.
- **High-Quality Construction:** Built with durable stainless steel for long-lasting performance and reliability.
- **Advanced Technology:** Equipped with servo drives for both the sealing system and film transport, ensuring precise, efficient operation.
- **Versatile Integration:** Can be supplied with complementary equipment such as multihead weighers, sauce depositors, and linear weighers to optimize packaging lines.
- **European Components:** All machines are fitted with top-quality European components, ensuring exceptional performance and reliability.

How the VFFS Machine Works:

1. **Forming:** The packaging film is unwound from a roll and pulled down to form a tube by sealing the edges together.
2. **Filling:** The product is dispensed into the tube in pre-measured quantities.
3. **Sealing:** The bottom of the tube is sealed to create a fully formed bag.

Control Options: Our VFFS machines are supplied with Siemens or Mitsubishi PLC controls for easy integration into your production line.

For more information or to discuss your specific requirements, please contact **Total Food Machines** at 02890 994 202 or email sales@totalfoodmachines.com. We are happy to assist you with finding the perfect packaging solution for your needs.
