

One Nut Diaphragm Transfer Pump

One Nut Diaphragm Transfer Pump

Introducing the One Nut Diaphragm Transfer Pump – a highly efficient Double Diaphragm Pump designed specifically for handling food products, particularly in high-viscosity, low-shear applications.

This pump is perfect for transferring products from cooking vessels or tote bins to other depositors, as well as for seamless product transfer between different vessels without compromising product integrity. It can handle both hot and cold products with ease, ensuring smooth and hygienic transfer between areas.

With a low shear rate, the One Nut Diaphragm Transfer Pump is capable of accommodating large or delicate solids, including those up to 25mm in size. Its user-friendly design includes a quick-strip feature, requiring no tools, or it can be cleaned in place (CIP) for maximum convenience and hygiene.

For more information or to discuss your specific needs, please contact Total Food Machines. We're here to provide solutions that meet your food processing requirements.
