Vertical Food Fill Seal Bagging Machines

TFM Vertical Form Fill Seal (VFFS) Machines

High-Efficiency Packaging Solutions for Diverse Industries

Total Food Machines offers a range of **Vertical Form Fill Seal (VFFS)** machines designed to meet the needs of modern packaging lines. From standalone VFFS units to complete systems with multihead weighers, we provide flexible solutions tailored to your production requirements.

Key Features:

- **Advanced Technology:** Equipped with Siemens or Mitsubishi PLCs, and all European components for reliable performance and longevity.
- **Versatile Sealing Options:** Sealing jaws available from 120mm to 600mm, adaptable to a wide range of packaging sizes.
- **Flexible Product Handling:** Suitable for both solid and liquid filling applications, ensuring versatility for diverse product types.
- **High-Speed Production:** Capable of producing up to **65 bags per minute**, depending on the product.
- **Multi-Product Capability:** Ideal for packaging fresh, frozen, dry products, and liquids, making it perfect

for a variety of industries.

Easy Setup & Operation:

Our VFFS machines are designed to be simple to set up and operate, minimizing downtime and maximising efficiency. Whether you're starting a new production line or upgrading an existing one, our solutions offer both reliability and scalability.

How VFFS Works:

The **Vertical Form Fill Seal** method creates a package during the filling process. The system starts with a large roll of film, which is formed into a bag shape. The product is then fed vertically into the bag, and the machine seals it, either horizontally or vertically, depending on your requirements. This efficient process ensures high-quality packaging at speed.

For more information or to discuss how our VFFS machines can enhance your production, please contact us at:
