

## Metalbud Nowicki Multi Needle Injectors

Total Food Machines supplies the complete range of Metalbud Nowicki Multi-Needle Injectors for accurately injecting brines, marinades, cures and flavour solutions into meat, poultry and fish.

Available models include the MHM-21/84, MHM-39/156 and MHM-68/204, providing flexible solutions for small, medium and high-volume food processors.

The advanced SAS range comprises the MH-75, MH-117, MH-212 and double-head MH-516, offering precise control for demanding industrial applications.

Depending on the model, the range provides up to 516 needles, injection levels from approximately 5% to 120% and production capacities reaching 20,000 kg per hour.

Programmable injection patterns and synchronised conveyor and injection-head operation provide excellent distribution across products of different shapes and thicknesses.

Multi-stage brine filtration, pressure control and closed circulation systems help maintain consistent injection quality while reducing waste.

Hygienic stainless-steel construction, removable injection heads and easy-clean conveyors simplify operation, maintenance and product changeovers.

Ideal for bone-in or boneless beef, pork and lamb, poultry portions, whole birds, fish and other food products requiring improved flavour, tenderness, juiciness and yield.

Contact Total Food Machines today on **[02890 994 202](tel:02890994202)** or email **[sales@totalfoodmachines.com](mailto:sales@totalfoodmachines.com)** to discuss the correct Metalbud Nowicki injector for your products and production capacity.
