

Kolbe Meat Mincers & Mixer Grinders

Kolbe Meat Mincers & Mixer Grinders

Kolbe Meat Mincers, Meat Grinders & Mixer Grinders

Total Food Machines supplies an extensive range of Kolbe meat mincers, grinders and mixer grinders for food-processing businesses of every size.

The range extends from compact table-top mincers for artisan producers to powerful industrial mixing and grinding systems for continuous production.

Kolbe machines are manufactured in Germany and are renowned for their robust construction, hygienic design and dependable performance.

Our range includes the TWK32 and TW100 table-top mincers and the SW100 floor-standing meat mincer.

For increased production requirements, the AWK130-160 and AW52-240 crossfeed mincers provide powerful and efficient processing.

Kolbe mixer grinders include the MWK32-45, MWK32-80, MW52-120, MW56-200 and high-capacity MW56-330.

The AWM52-240 and AWM56-240 provide advanced automatic mixing and grinding for demanding industrial applications.

These machines can process fresh and frozen meat, poultry, fish, vegetables, cheese, pet food and many other food products.

Kolbe mixer grinders combine thorough, consistent mixing with efficient grinding in one hygienic production machine.

This reduces manual handling, saves labour and helps deliver a uniform product with excellent particle definition.

Applications include sausages, burgers, meatballs, kebabs, minced meat, fishcakes, ready meals and pet-food products.

A selection of motors, cutting systems, mincing plates, loading systems and production options is available to meet individual requirements.

Whether you are a butcher, supermarket, food manufacturer or high-volume processor, we can help select the correct Kolbe machine.

Contact Total Food Machines on 0044 (0) 2890 994 202 or email sales@totalfoodmachines.com to discuss your requirements.
