

REX Vacuum Fillers, Sausage Fillers & Portioning Equipment

Total Food Machines supplies a comprehensive range of REX vacuum fillers, sausage fillers and portioning equipment for professional food production. REX systems are engineered for accurate filling, gentle product handling and consistent portion control across a wide variety of meat, poultry and alternative food products.

The range includes compact and industrial vacuum fillers, piston fillers, grinding systems, burger formers, meatball machines, mince portioning lines and high-speed sausage cutting equipment. Modular attachments allow processors to fill, portion, grind, form, link and cut products using an efficient and flexible production system.

REX vacuum fillers provide controlled product flow and repeatable weights while helping maintain product structure and appearance. They can be configured for straight filling, sausage production, burger forming, meatball production, minced-meat portioning and connection to further processing equipment.

Burger and meatball forming attachments make it easy to produce consistently shaped products from meat, poultry, potato, bread and vegetable-based mixtures. REX sausage linking and cutting systems provide clean, accurate separation for natural and artificial casings at production speeds suited to modern food factories.

For higher-volume applications, individual REX machines can be combined with grinding heads, portioning conveyors and cutting equipment to create a complete integrated processing line. This modular approach allows a system to be designed around the required product, portion size, output and factory layout.

Whether you require a single REX machine, an attachment for an existing vacuum filler or a complete filling and portioning line, Total Food Machines can help identify the right solution. Our range covers new and used food processing machinery for businesses throughout the UK, Ireland and international markets.

Explore the REX equipment listed in this section or contact our sales team to discuss your product, production requirements and preferred machine configuration.

REX VACUUM FILLERS & PORTIONING SYSTEMS

PRECISION FILLING • FORMING • PORTIONING • CUTTING

COMPLETE SOLUTIONS FOR MEAT PROCESSING

VACUUM FILLING

- ✓ ACCURATE, CONSISTENT PORTIONING
- ✓ GENTLE PRODUCT HANDLING
- ✓ HIGH SPEED PRODUCTION
- ✓ HYGIENIC CHROMIUM STEEL BODY
- ✓ FLEXIBLE, MODULAR SYSTEMS
- ✓ COMPLETE LINE INTEGRATION

APPLICATIONS: MEAT • POULTRY • POTATO • VEGETABLE PRODUCTS

BURGERS **MEATBALLS** **SAUSAGE CUTTING** **MINCE PORTIONING**
