

Tote Bins Euro Bins

Total Food Machines supplies a comprehensive range of new and used Tote Bins, Eurobins and Meat Trolleys for hygienic product handling throughout food-processing facilities.

Our range includes 200-litre and 300-litre stainless-steel tote bins, coloured plastic tote bins, perforated bins and specialist models fitted with pouring lips, drainage systems, lids or ergonomic handles.

Manufactured for demanding food-production environments, our stainless-steel tote bins feature strong welded construction, smooth hygienic surfaces and heavy-duty castors for easy movement around the factory.

These versatile bins are ideal for transporting, storing, mixing and handling meat, poultry, fish, vegetables, ready-meal ingredients, dry products, pet food and many other materials.

Different wheel colours and bin configurations can help separate ingredients, production areas or allergen-controlled processes. Tote bins can also be supplied to work with mixers, mincers, vacuum tumblers, depositors, scales, lifters and automated processing systems.

Whether you require one replacement tote bin or a complete fleet for a new production line, Total Food Machines can help you select the correct capacity, material and configuration.
