

Lazy Susan

Lazy Susan

Turntable

Stainless-Steel Lazy Susan Rotary Tables provide an efficient solution for collecting and accumulating packaged products at the end of food-production, inspection and packaging lines.

The smooth rotating tabletop keeps finished products moving and easily accessible to operators, helping reduce conveyor congestion, eliminate production bottlenecks and improve manual packing efficiency. A 40 mm raised rim helps prevent products from falling from the table during rotation.

Available with table diameters of , 1,200 mm, 1,500 mm and 2,000 mm each model features an 850 mm working height adjustable ± 50 mm three-rpm rotation and a powerful 0.25 kW motor.

Optional stepless speed control allows the table speed to be matched with your existing production line.

Manufactured from polished stainless steel, the hygienic welded construction is durable and easy to clean.

Three braked swivel castors allow the table to be moved quickly and secured safely in its operating position.

Ideal for positioning after tray sealers, flow wrappers, thermoforming machines, labellers, inspection conveyors and manual packing stations.

Suitable for ready meals, packaged meat, poultry, fish, bakery products, salads, fresh produce and many other packaged foods.

Contact Total Food Machines today to discuss the correct Lazy Susan Rotary Table size for your production and packaging requirements. Total Food Machines 02890 994 202 or email sales@totalfoodmachines.com
