

Stainless Steel Trolleys

Total Food Machines supplies a comprehensive range of stainless-steel trolleys designed for safe, hygienic and efficient internal transport throughout food-processing and packaging facilities.

Our range includes heavy-duty platform trolleys, EURO-container trolleys, double EURO trolleys, GN tray rack trolleys, delivery and transport trolleys, and specialist meat-display trolleys. Different configurations are available for moving ingredients, packaged foods, crates, trays, tools and production equipment.

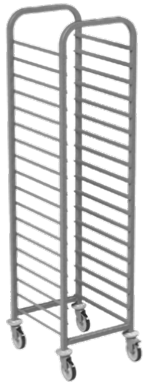

Manufactured from polished stainless steel, these robust trolleys are easy to clean and suitable for demanding hygiene-controlled environments. Heavy-duty castors provide smooth movement and excellent manoeuvrability around production areas, packing rooms, cold stores and warehouses.

Our platform trolley can safely transport loads of up to 300 kg and features two fixed and two swivel wheels for stable movement with easy directional control. Rack and container models are available in different sizes and shelf configurations to suit individual production requirements.

Whether you require one specialist trolley or a complete range for a new production facility, Total Food Machines can help you select the correct design, dimensions and capacity.

Contact our sales team today to discuss your stainless-steel trolley and internal product-handling requirements. Call us on 02890 994 202 or email sales@totalfoodmachines.com
