

Automatic S45 Preglued Sleever

S45 Automatic Preglued Sleeving Machine

The S45 Automatic Preglued Sleever provides a fast, compact and cost-effective solution for applying preglued cardboard sleeves to trays, pots and packaged food products. It automatically picks each flat sleeve from the magazine, opens it and accurately inserts the product, creating a consistent and professional retail-ready pack.

Capable of operating at speeds of up to 45 packs per minute, depending on the product and sleeve specification, the S45 helps reduce manual labour, increase production and improve pack presentation. Its compact stainless-steel construction makes it ideal for food factories where hygiene, reliability and available floor space are important.

The S45 can be integrated with tray sealers, conveyors, labelling equipment and complete end-of-line packaging systems. Easy-to-use controls, fast product changeovers and Wi-Fi-enabled remote customer support help keep production running efficiently.

Suitable products include:

- Ready meals and meal trays
- Fresh meat and poultry
- Fish and seafood products
- Fresh produce and prepared vegetables
- Bakery and confectionery products
- Dairy products and desserts
- Plant-based and convenience foods
- Pots, tubs and sealed trays

Total Food Machines can supply the S45 as an individual machine or as part of a complete integrated sleeving and packaging line for customers throughout the UK, Ireland and worldwide.
