

Loma IQ3 Metal Detector & CW3 Checkweigher Combi Unit

Loma IQ3 Metal Detector & CW3 Checkweigher Combi Unit

Loma IQ3 and CW3 combination unit provides metal detection and dynamic checkweighing within one compact, stainless-steel system. Designed for food and packaging production lines, it simultaneously inspects products for metal contamination and verifies that every pack meets the required weight.

The integrated design can save valuable production-floor space compared with installing two separate inspection machines. A user-friendly touchscreen provides straightforward operation, while separate rejection stations automatically remove contaminated and incorrect-weight products into secure, lockable reject bins. This reliable inspection system supports strong quality control, traceability and Critical Control Point procedures.

Key features:

- Loma IQ3 variable-frequency metal detector
- Loma CW3 dynamic checkweigher
- Metal-detector aperture: 400 × 130 mm
- Checkweigher belt: 400 × 500 mm
- Touchscreen controls
- Push-arm rejection system
- Separate metal and weight reject sections
- Secure, lockable reject bins
- Blue antistatic polyurethane conveyor belt
- Brushed stainless-steel construction
- Manufactured in 2012
- Compact, integrated combination design
